#### Earthwool® Sound Absorbing Insulation

# Insulate your internal walls for a peaceful and comfortable home

If you're building a new home or renovating an existing home, ask your builder to install Earthwool in all your internal walls to absorb unwanted sounds, so you can live in a peaceful and quiet environment.

## Why is Earthwool the best solution?

- It provides excellent acoustic performance by absorbing sound and limiting noise transfer between rooms
- It's a sustainable glasswool insulation made using recycled glass and with ECOSE® Technology
- It contains no added formaldehyde
- It comes with a 50 year warranty
- Internal wall insulation gives the house a feeling of being grounded, more solid and of a higher quality construction.

#### Earthwool® Sound Absorbing Insulation

Earthwool insulation is made using recycled glass and with ECOSE® Technology, a revolutionary binder that contains no added formaldehyde. Glasswool has high acoustic perfomance as it can absorb sound and, therefore, limit the transfer of noise. The higher the density, the better the insulation will perform at absorbing sound. Furthermore, internal wall insulation gives the homeowner more control when heating and cooling zones of the house providing the opportunity to heat or cool one room rather than the whole house.

#### Earthwool Acoustic Insulation (partition wall)

DENSITY	PRODUCT DIMENSIONS
11kg/m³	430, 450, 580 or 600(W)mm x 50, 75 or 100(D)mm x 1160 or 2700(L)mm
14kg/m³	430, 450, 580 or 600(W)mm x 50 or 75(D)mm x 1160(L)mm
17kg/m³	430 or 580(W)mm x 75(D)mm x 1160(L)mm
20kg/m³	430 or 580(W)mm x 90(D)mm x 1160(L)mm
27kg/m³	430 or 580(W)mm × 90(D)mm × 1160(L)mm
