

HURFORD RECYCLED TIMBER

TURNING THE PAST INTO THE FUTURE

The end of the line doesn't have to mean the end of the line...

Sometimes as a product such as wood finishes its intended use, it doesn't need to be wasted, the opportunity arises for it to be reborn and given a new lease of life.

Hurford Recycled Timber scours the Northern NSW region for timber that is destined to be scrapped and wasted, it then machines and process the old and produces it into high quality flooring products that not only has the aesthetics, but a history of a whole other life.

Hurford Recycled Timber has nearly 100 years of timber processing and machining behind it, and spends an extended period of time to ensure the timber is recovered correctly, properly milled and kiln dried, to ensure a high quality finished product is achieved.

Wood source: Recycled Australian Hardwood from discontinued Rail line, Rail line upgrades, Wooden Bridges, wharfs and girders.

HURFORD RECYCLED TIMBER

TURNING THE PAST INTO THE FUTURE
