

# Xanita and the environment

## Impact on resources

- Our raw material comes from a renewable resource.
- Our virgin fibre supply is Forest Stewardship Council (FSC) accredited.
- 1 ton of our recycled board saves over 2 cubic meters of landfill and 17 trees.
- We do not use fossil fuels in the origin of our raw materials.

*Xanita Board is made from post-consumer repulped paper waste*

*Xanita Board is repulpable and recyclable*

*Our raw material supplier is Forest Stewardship Council (FSC) certified*

## Impact on sustainability

- Our 'cradle to cradle' approach benefits the environment.
- Our products are all 100% recyclable and repulpable.
- We reduce the use of energy and raw materials.
- We reduce waste.
- We avoid enviro contamination.

## Impact on natural ecosystems

- Our products are all Volatile Organic Compound (VOC) free.
- Our products are Elemental Chlorine Free (ECF) when bleaching – There is no CO<sup>2</sup> by-product.
- Our water based value added resins are all VOC free.
- Our adhesives are organic and VOC free.

*The finished products are also flat packable and re-usable.*
