LANNA GARDEN SCREENS

Our range of vertical garden screens are designed and made in Melbourne to an architectural standard from pre-galvanised wire with zinalume components.

Available in a satin black or white powdercoated finish, our Lanna Garden Screens include a choice of colour matched polypropylene or natural terracotta pots and polished river pebbles for ballast.

All of our vertical garden screens include concealed mounting points welded into the back and base of each screen for floor or wall mounting where required.

Talk to us about creating custom size vertical garden screens for your next project.

Designed and made in Australia.
