

ALPINE FINELINE RUSTIC URBAN

The premium ply for:

- Feature Wall panelling
- Architectural Joinery
- Furniture
- Custom Lay-up

FINELINE

- Manufactured from European Birch edge-grain timber, Birch is a hardwood with neutral colour tones featuring dark pith-spots and bark stains which add an interesting character and feature. The 1.5mm thick multi-veneer consistent look is the reason FINELINE has its name.
- Available as either a Veneer or Solid panel, veneered panels can be either single-sided or double-sided with a Birch plywood core or MDF substrate. Solid panels are available from 20mm thick up to 60mm thick.
- MAXI-Edge FINELINE comes standard as long-grain panels (the grain runs the longer length of the panel) – Cross-grain panels can be made at the clients request.

RUSTIC

- Manufactured from Douglas Fir Timber, this American softwood is one of the world's best-known timber species. The timber varies in colour quite considerably from Yellow through Orange to a deep Reddish Brown with a coarse and uneven texture from which the RUSTIC name was derived.
- Available as either a Veneer or Solid panel, veneered panels can be either single-sided or double-sided with Exterior Hardwood ply core or MDF substrate. Solid panels are available from 20mm thick up to 60mm thick.
- MAXI-Edge RUSTIC comes standard as long-grain panels (the grain runs the longer length of the panel) – Cross-grain panels can be made at the clients request.

URBAN

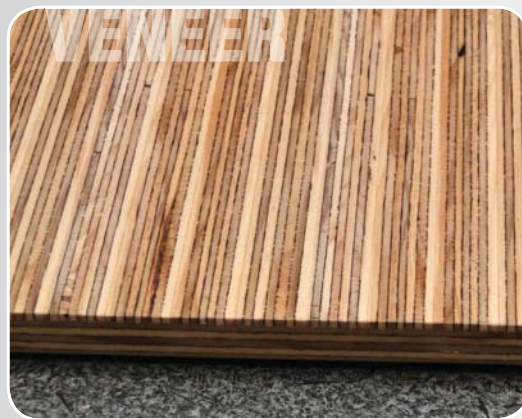

- Manufactured from African Okoume timber, the URBAN carries tones of Pale Pink thru to Light Browns with hints of Grey and is rather uniform in its appearance.
- Available as either a Veneer or Solid panel, veneered panels can be either single-sided or double-sided with Exterior Hardwood ply core or MDF substrate. Solid panels are available from 20mm thick up to 60mm thick.
- MAXI-Edge URBAN comes standard as long-grain panels (the grain runs the longer length of the panel) – Cross-grain panels can be made at the clients request.

ALPINE

- Manufactured from Radiata Pine edge-grain timber, this softwood is typically sourced from Australia and New Zealand and has a warm neutral colouring with very distinct grain patterns.
- Available as either a Veneer or Solid panel, veneered panels can be either single-sided or double-sided with Radiata ply core or MDF substrate. Solid panels are available from 20mm thick up to 60mm thick.
- MAXI-Edge ALPINE comes standard as long-grain panels (the grain runs the longer length of the panel) – Cross-grain panels can be made at the clients request.

MAXI-Edge is available in four different styles: ALPINE, FINELINE, RUSTIC and URBAN. Available as either Solid or Veneer panels, the MAXI-Edge lends itself to a wide-range of applications from Bench tops, Table tops and Stair treads to Wall & Ceiling panelling and Joinery applications. All MAXI-Edge panels are made-to-order to suit each client's specific requirements and needs.

MAXI-Edge Veneer panels can be manufactured as either single or double-sided panels from a 3mm thick veneer – standard they are produced with a matching plywood core or they can be made with an MDF core for applications such as Wall & Ceiling panelling to keep costs down. The MAXI-Edge Veneer panels come standard as Long-grain and can be ordered as Cross-grain if required.

MAXI-Edge Solid panels are available from 20mm up to 60mm thick, 300 to 1200mm wide and up to 4.8m long. Standard they are made in Long-grain configuration but can also be made as Cross-grain upon request. Panels up to 2.4m long are made as single-piece timber strips – panels longer than 2.4m will have staggered joints through-out the panel.

The MAXI-Edge ALPINE is manufactured from Radiata Pine timber, the FINELINE is made from European Birch, the RUSTIC is made from feature-grade Douglas Fir timber and the MAXI-Edge URBAN is made from Okoume timber. Contact our sales team today to discuss your particular requirements for the MAXI-Edge panels.

Sheet sizes available:

2400 X 1200mm / 3000 X 1200mm
