# Raft Assemble

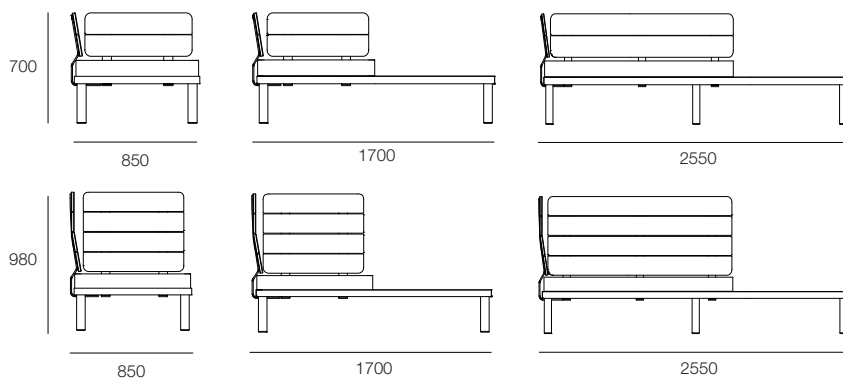

by Justin Hutchinson

Raft Assemble has been designed to be modular with interchangeable components that can be reconfigured that include low or high back rests and sides, study tables, side arms and planter boxes. Base platforms in 1700mm and 2550mm lengths form the building blocks of the range.

Suitable for residential, hospitality or corporate environments, Raft Assemble has been designed for all weather exposure in the outdoors, yet is equally at home indoors. Raft Assemble features a mild steel, zinc powdercoat frame with Australian Spotted Gum timber slats.

Seat and back rest cushions comprise marine-grade foam, preventing water absorption and mould, and may be upholstered in specified outdoor fabric.

The legs of Raft Assemble are available in powdercoated mild steel or Spotted Gum timber, with floor fix capability available upon request.

## Lead time

6 Weeks

## Warranty

5 year structural warranty

## Accessories

Side Table

## Maintenance
