

## Case Study

# Gerda Fanning

The vibrant shades of blue and orange look stunning in combination with the clean white of Maxi Film in this beautiful retro-inspired residential kitchen. An important part of the design brief was to create pops of colour, complemented by subtle tones of timber and this has been achieved through smart product choices and thoughtful placement.

White Maxi Film features on the bench tops, cabinetry, border and designer wall feature complete with display shelving.

For builder Woodbeast, the attractive finish, vibrant colours and durability of the Maxi Film plywood panels made them the ideal choice for this designer kitchen.
