

retyred  
ORIGINAL

We want to inspire people and industries by designing, producing and marketing outstanding products by using old tyres as a resource.

Retyred Original. It's not recycling. Also not upcycling. Retyred ORIGINAL is something new made of something with experience. Something great made of used materials. We at retyred ORIGINAL see the great potential in things others don't need any more. So somehow retyred ORIGINAL is a bit like reincarnation. Reincarnation to an even better life than before. retyred ORIGINAL.

It is estimated that around 1 billion end-of-life tyres are generated in the world each year.

Retyred Original furniture is handmade & crafted from used tyre material each with its own individual journey to show & tell.

Up cycled rubber is an excellent material for outdoor furniture - it is robust and therefore extremely long lasting in all weather conditions.

“Retyred ORIGINAL” stands for outstanding furniture design made from a constantly growing raw material - old tyres.

Experienced and brand new, beautiful and distinctive, durable and comfortable, creating outstanding strong combinations.

Scrap tyres, whether we like it or not, are a steady and fast growing raw material.

“Retyred ORIGINAL” impresses with round forms in its design, sensationally comfortable chairs with almost endless durability.

A versatile collection of furniture which is characteristic in design, mature in production and extremely durable and comfortable in use.

## BLACK TYRE RANGE

---

**BLACK TYRE RANGE** is the original hand crafted furniture made entirely out of used tyre materials. The founders of Retyred ORIGINAL, Monica Corser and Bernie Kudernatsch met in Bali 9 years ago, where they discovered some simple and comfortable chairs made from old tyres. Inspired, they pursued the idea together, setting up the factory, working hard on quality and production, and bringing in many new designs. Up cycled rubber is an excellent material for outdoor furniture - it is robust and therefore extremely long lasting in all weather conditions.

## TEAK & TYRE RANGE

---

**TEAK+TYRE** product line, created by Monica Corser for the international market launch, with the first ever combination of teak wood with old tyres. This results in a very simple combination of two very durable raw materials, but the use of old tyres is no longer recognisable with the new designs often being mistaken for black leather, but with the comfort and flexibility and the up cycling of the rubber. *“This has allowed us to explore a broader scope in the market”* says Monica Corser

## STORAGE RANGE

---

*"The idea is wonderful and the implementation is first class. Why should only newly mined materials be something special? What does it mean to use an unconventionally renewable raw material, which is present in vast quantities and is still incredibly robust? We are only limited by our own mind, because the design is great, the material incredibly comfortable and robust and the processing is highly sophisticated." Says Monica Weinzettl from KastlWerksatt in Vienna*
