With over 25 years of industry experience, **SUNLITE AUSTRALIA** is the market leader in the field of natural lighting.

SUNLITE Louvres have been innovatively designed for use in a wide variety of aesthetic and/or performance based situations and applications.

SUNLITE AUSTRALIA can custom design its products to complement traditional buildings or enhance contemporary structures. Our extensive range of aluminium Louvres can be fabricated into hinged panels, fixed panels, privacy screens, sliding and bi-fold panels or a "slide and stack" system. Sunlite Louvres provide shade, overhead weather protection, light control, airflow, comfort, privacy and security.

Why Sunlite Louvres?

- Maximise the benefits of natural filtered sunlight. Generate an energy efficient living or working environment by directly reducing light and heat penetration through glazed or exposed locations and surfaces.
- Maximum energy efficiency. Reduce the summer heat load and keep air-conditioning running costs to a minimum. In the winter, direct the sunlight and warmth onto and through glazed or open areas.
- Our aluminium Louvres are lightweight, strong, durable and long lasting.
- Engineered to suit your climatic requirements.
- Allow free flow of air. Create a natural breezeway.
- Protect your privacy and secure your living and working environment.
- Choose your colour! Metalwork is finished in a polyester powdercoat paint, or if you prefer, Anodising allows the aluminium to maintain its metallic appearance.
- Achieve total design freedom. Choose electronic or computer enhanced control.
- Low Maintenance requirements. Our Louvres are easy care. Give them a hose down and gentle wash. Keep them free from a build up of dust and debris, and use them regularly. Unlike timber louvres, our aluminium louvres will not crack, split, warp or fade, and will not require re-oiling, varnishing or painting.
- Save the trees. Aluminium is a sustainable material. Products made from aluminium can be recycled repeatedly. The increasing use of recycled metal saves both energy and mineral resources.
- Keep it local! Our Louvres are completely Australian made and our company is Australian owned.
- Superiority. Say no more. You will not find a product better than **SUNLITE AUSTRALIA'S** Louvre series.
