Sphera is a stylish and design inspired collection of premium homogeneous vinyl flooring.

Innovative, design driven homogeneous vinyl

Sphera is Forbo's brand of premium homogeneous vinyl flooring. A diverse and fit for purpose design offer adding style and comfort to any interior. All Sphera collections are carefully developed by our in-house design team in Europe with different application areas in mind. Sphera provides healthy and hygienic solutions using the latest production technology.

Fit for purpose

The three distinctive collections have their own character and profile. Sphera Element has the most complete colour proposition commercially available and the subtle design is ideal for use in areas where the floor is required to softly blend in with the environment. Sphera Energetic offers a playful combination of a coordinated colour palette and designs with different intensity and scale. The lightweight and durable Sphera Elite has an intriguing, sophisticated appearance and will transform your area into a higher level visual and appealing place.

Creating better environments

From the initial concept Sphera has been developed to avoid any unnecessary waste and minimize energy and raw material use. Sphera is a premium quality homogeneous vinyl through and through. All waste is reused in other premium products from Forbo Flooring Systems. Sphera is produced with 100% green electricity with minimal impact on the environment and complies with the GBCA's requirements for Best Environmental Practice PVC.

Sphera Element has the most complete and widest colour offer of all homogeneous floors. With a broad range of subtle and soft neutrals along with contrasting tones, Element is ideal for use in areas where the floor is required to blend with the environment. The carefully selected outspoken pastels and bright accent colours are ideal for areas requiring zoning or to create an authentic and welcoming interior.

This exciting range brings a new dynamic to homogeneous vinyl flooring. With its vibrant visuals it answers the diverse needs in modern spaces. Sphera Energetic offers a playful combination of a co-ordinated colour palette and designs with different intensity and scale, making it fit for purpose across any function or intensity of use.

sphera® elite

Sphera Elite has an intriguing appearance, making a subtle reference to natural materials. The organic pattern will transform your area into an appealing place and the floor will perform for many years with its forgiving visual and extremely durable construction.

dynamics of a building

The dynamics of a building philosophy no longer looks at the traditional split in segments but works from a philosophy that is based on the identity a space has and what function it serves for the users. In the built environment there are many functions that need to be fulfilled and using this identity as a guiding system works on ensuring the optimal atmosphere and design in a building. Each dynamic has its genuine identity created by the contrast, intensity and positioning of the colours. It is the overall expression of the selected colours that represents the defined atmosphere, the examples shown give you some of our inspiration. With its vibrant visuals, Sphera meets the diverse needs in modern spaces and brings a new dynamic to homogeneous vinyl flooring.

Forbo Flooring Systems was one of the first companies worldwide to embrace EPDs and has comprehensive coverage across our product portfolio. A specific EPD for Sphera with additional information to show the impact on human health and eco toxicity is available.

Producing Sphera at 2mm thick in one step.

without back sanding, reduces waste by 10-15%.

The little waste created gets safely recycled into

our heterogeneous vinyl collections, through

our internal recycling process on site.

Product stewardship

Sphera third party EPD

Avoid waste, save energy

Forbo Flooring Systems offer installation waste take-back programs and work with existing industry bodies to recycle where available and the balance for logistics and sustainability makes sense. We have several programs for vinyl, including recycling of Sphera, in a growing number of countries.

Reducing CO₂ emissions with Green Electricity Sphera is produced with 100% electricity from

renewable resources, significantly contributing to the reduction of CO₂ emissions.

DESIGN A COLOUR

- A diverse offer of colour and design to meet all requirements and dynamics
- Infinite possibilities to combine within and between the 3 collections and all coordinated with Forbo's extended functional portfolio of floor coverings.
- Contemporary globally relevant colour palette, including a large selection of colours with high LRV's and low gloss to enhance user experience.

TECHNOLOGY A SUSTAINABILITY

- The SMART-top surface finish and its consistent application ensure the highest resistance to chemicals, scratches and stains, providing superior all over protection and easy cleaning
- Sphera meets the Green Building Council of Australia's Best Environmental Practice PVC requirements.
- Sphera Element is approved for use in cleanrooms up to ISO class 4 by the Fraunhofer Institute.

PERFORMANCE A DURABILITY

- Low emissions & phthalate free manufacturing contribute to a healthy indoor
- New technology powered by green electricity, delivers consistent quality in an efficient and sustainable way with zero waste.
- Carefully selected raw materials to offer possibilities for recycling after end of life.
- Low energy and water use thanks to the efficient state-of-art production process.
