WHEN WET**

**WASHABLE and  
WATERPROOF**

**MECHANICAL  
WET CLEANING  
POSSIBLE**

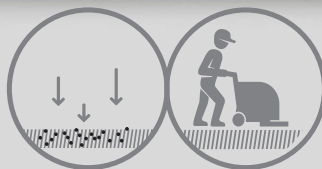

**THE ONLY FLOORING TEXTILE  
WITH APPROVAL FROM THE  
BRITISH ALLERGY FOUNDATION**

## FLOTEX

Up to 80 million straight nylon fibres per m<sup>2</sup> are electro-statically flocked into the backing capturing fine dust and allergens. The unique structure ensures dirt and allergens can be released when vacuumed. This is why Flotex is the only textile flooring with the British Allergy Foundation seal of approval.

**30% MORE SOIL  
RELEASED THAN CARPET**

## CARPET

Loop and cut pile carpet have fibres and a structure that are less straight and open when compared with Flotex. Looped and curved fibre structures make removing allergens and fine dust difficult with more intense cleaning efforts.
