

Invisible surface protection

Parquet specialist Max says: "With **2K InvisibleProtect^{A+}** the floor looks absolutely natural but the invisible surface protection is more than a match for the hardest wear. The perfect choice for anyone who likes to see and feel pure nature."

A new kind of waterborne surface protection for wood and cork floors

The innovative 2-component surface protection **2K InvisibleProtect^{A.T.}** combines the characteristics of a waterborne sealed finish with those of an oiled floor – without the ambering effect of an oil. The finished surface appears absolutely clear and invisible while protecting the flooring comparable with LOBA's most durable film forming finishes. Wooden surfaces coated with **2K InvisibleProtect^{A.T.}** looks and feels like untreated wood. Designed for use in the home as well as for high-wear areas.

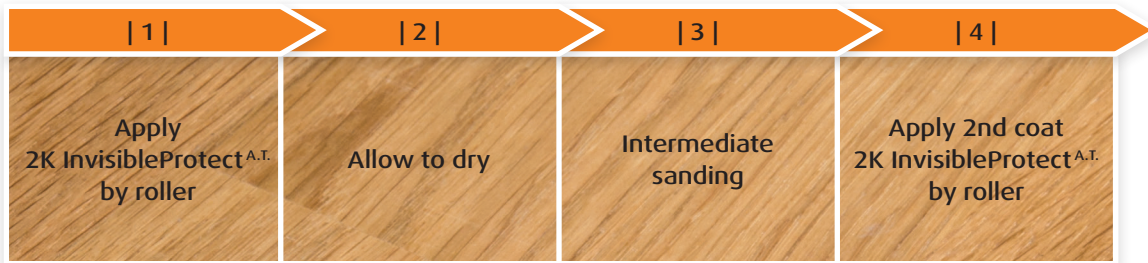

- Natural texture and feel are similar to untreated wooden floors
- Floors look clear without
- Waterborne, 2-component
- Particularly easy to apply

LO-FI-238 | Package 1 Gal.

- Self-sealing, no primer needed
- Excellent chemical resistance
- Meets the OSHA requirements for walking surfaces of 0.5 (ASTM D2047-04)

Application*:

Cleaning tip:

For everyday maintenance cleaning, we recommend the LOBA SprayMop.

*Observe the detailed information, information on use and set up recommendations.
